(Replacing high volume urinal with high efficiency urinal)
 Old Manufacturer: _____
 Old Model: _____
 New Manufacturer: _____
 New Model: _____
 Purchase Price: _____

Water Efficient Fixtures Account Credit Program Terms and Procedures

Devices must be purchased and installed no more than 90 days prior to submitting application

- A HET uses an average of 1.28 gallons per flush or less. A high efficiency urinal uses .5 gallons per flush or less.
- Confirm that the device(s) is/are identified on the list of approved products. For ULFT/HET/DFT/URINAL rebates, the model numbers for both tank and bowl must be on the list. For clothes washer(s), the device(s) must have a water factor of 6.0 or less.
- Please visit www.svwd.org or call the district at (831) 438-2363 to confirm eligibility for toilet and washer rebates.
- Mail or fax your completed rebate application along with receipt to Scotts Valley Water District.
- Applications for rebate must be submitted within 90 days of the purchase date shown on the receipt.
- Approved applications appear as a credit applied directly to your account. Under no circumstance does the district issue cash or check refunds.
- Rebate credits are applied to the account associated with the service address where the replacement was made. If you are a property owner and you are applying for a rebate on a replacement made at a location where the water bill is in the tenant's name, the rebate will be applied to that tenant's account.
- A representative of SVWD must be permitted to inspect the property to verify installation if necessary.
