

# Scotts Valley Water District High Efficiency Toilet Retrofit Rebate Requirements

## What are High Efficiency Toilets (HETs)?

- HETs are toilets which flush at a rate of 1.28 gallons per flush (gpf);
- There are three types of HETs:
  - \* Single Flush,
  - \* Dual Flush - two flush options that average 1.28 gpf,
  - \* Pressure Assist - primarily for commercial use
- HETs only use approximately 7,500 gallons per year. Retrofitting an old toilet with a HET can lead to a savings of up to 24,600 gallons per year!

## Rebate Program:

- \* Customers replacing a toilet using more than 1.6 gpf with an HET are eligible for a credit of up to \$100.00
- \* Customers replacing a toilet using 1.6 gpf with an HET are eligible for a credit of up to \$50.00
- \* Additionally, customers who are on the City of Scotts Valley sewer system qualify for an added rebate of up to \$100.00, for replacing a toilet using more than 1.6 gpf, or up to \$50.00, for replacing a toilet using 1.6 gpf
- \* The total rebated amount awarded cannot exceed the purchase cost of the HET
- \* In order to receive the rebate, customers must turn in a completed Water Efficient Fixtures Account Credit application along with the receipt of the purchase of the HET(s)

For a list of qualifying HETs, the Water Efficient Fixtures Account Credit application, and additional information on the Toilet Retrofit Rebate program, please visit the Scotts Valley Water District website at [WWW.SVWD.ORG](http://WWW.SVWD.ORG)
