

Scotts Valley Water District High Efficiency Washer Retrofit Rebate Requirements

What are High Efficiency Washers (HEWs)?

- HEWs are washers which use over 50% less water and 30% less energy than regular washers;
- All HEWs should have an Energy Star approval;
- Retrofitting an old washer with an HEW can save a single family residence 6,000 gallons of water per year or more!

Rebate Program:

- * Residential customers replacing an old washer with an HEW are eligible for a credit of up to \$100.00;
- * Commercial businesses replacing an old washer with an HEW are eligible for a credit of up to \$200.00;
- * Additionally, customers who are on the City of Scotts Valley sewer system qualify for an added rebate of up to \$100.00, for residential customers, or up to \$200.00, for commercial businesses;
- * The total rebated amount awarded cannot exceed the purchase cost of the HEW;
- * In order to receive the rebate, customers must turn in a completed Water Efficient Fixtures Account Credit application along with the receipt of the purchase of the HEW(s).

For a list of qualifying HEWs, the Water Efficient Fixtures Account Credit application, and additional information on the Washer Retrofit Rebate program, please visit the Scotts Valley Water District website at WWW.SVWD.ORG
